

About PATRIOT-NRG

PATRIOT-NRG is a Slovak-Ukrainian group of companies thriving to develop ecologically friendly renewable resources and grow the awareness of the population about the importance of caring for the environment. Our new innovative product, a Mobile Autonomous Solar-Wind Electrical Station (MASWES), is the most economically efficient station on the market, the prototype of which is expected by 2023. As members of PATRIOT-NRG team we put our hearts and minds to a MASWES project with a desire of more autonomous, affordable and reliable energy. In the future, we see our company as one of the lead influencers in the growth of clean evolution.
